

What are the models and outcomes of Public and Patient Involvement (PPI) in cancer and palliative care research?

Included Studies:

Studies were included where it was reported that a member of the public was involved as defined by [INVOLVE](#). "Public involvement in research as research being carried out 'with' or 'by' members of the public rather than 'to', 'about' or 'for' them".

Disclaimer: Palliative Care Evidence Review Service (PaCERS) is an information service for those involved in planning and providing palliative care in Wales. Rapid reviews are based on a limited literature search and are not comprehensive, systematic reviews. This review is current as of the date of the literature search specified in the Review Methods section. PaCERS makes no representation that the literature search captured every publication that was or could be applicable to the subject matter of the report. The aim is to provide an overview of the best available evidence on a specified topic using our documented methodological framework within the agreed timeframe.
